

Joshua Fouch

Port UX changes

March 27th, 2025

What will be Changed?

1. Color Scheme Improvements:

- a. Change color of active-page text from white to black
 - i. *for ease of reading*
- b. Change color of dropdown widgets from red to black
 - i. *for consistency in color scheme*

2. Media Change

- a. Delete the Hero image
 - i. *To convey a more minimalistic style*

3. Typography and Element Consistency

- a. Remove unnecessary wording
- b. Make Library search button the same as other widget buttons

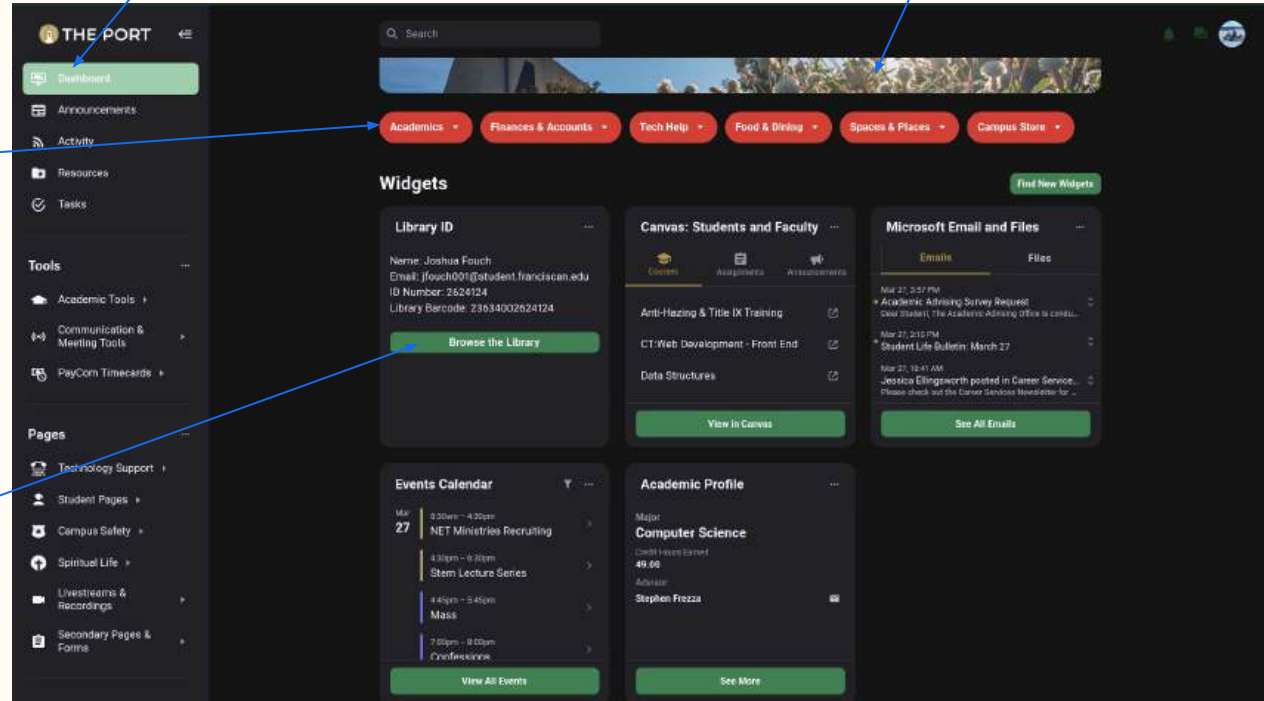

Original Design

To much going on in the hero-picture

Hard to read active-page bar

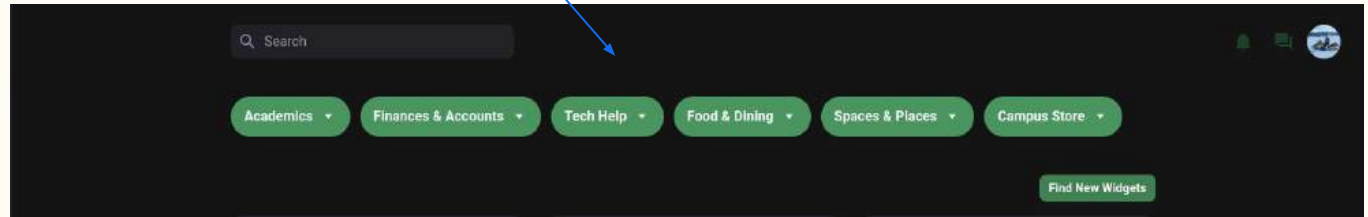

The Red doesn't fit color scheme

Widgets are disproportional

My Form/Media Change

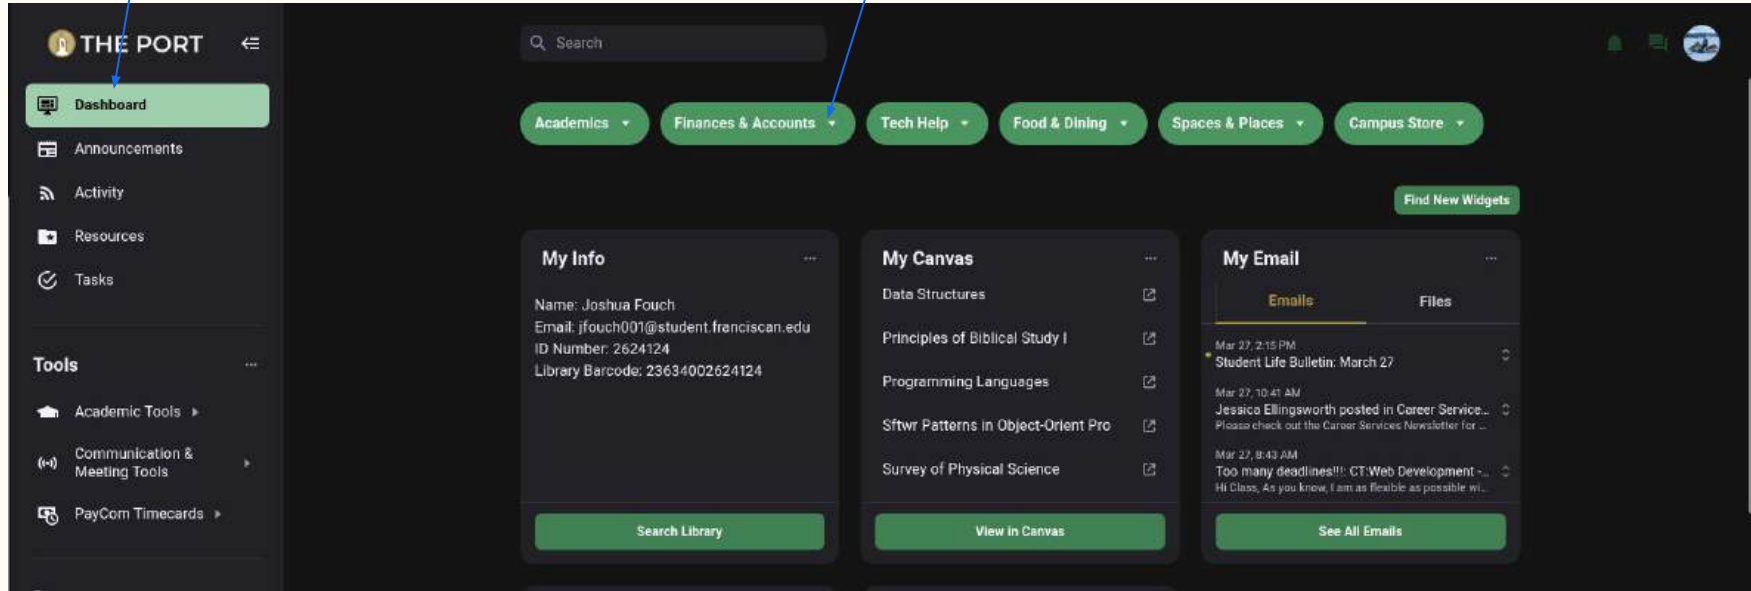

Completely got rid of the hero-image to improve the minimalistic/modern style of the Port

Color Scheme Improvements 1

Change active-page color from white to black for easy of reading

Change links from red to green for color scheme consistency

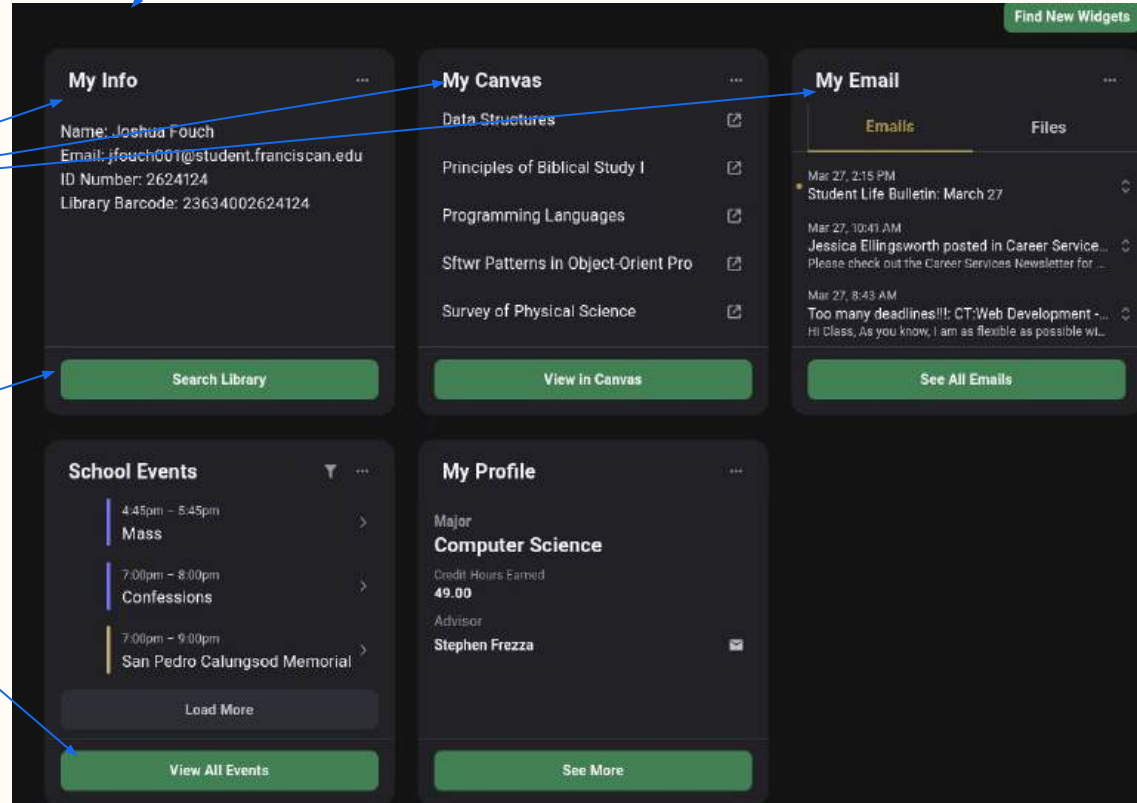

Typography and Element consistency

Deleted unnecessary wording
such as the "Widget" header

changed Widget headers to
be less wordy

made search library
button consistent with
other buttons

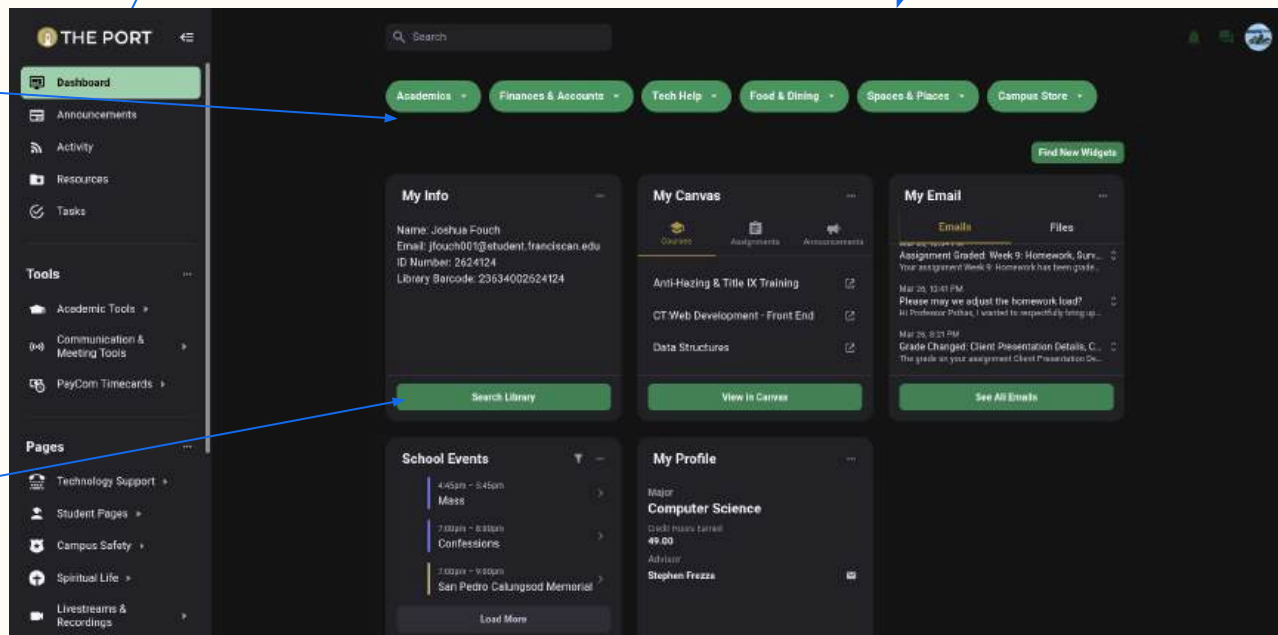

The new Port

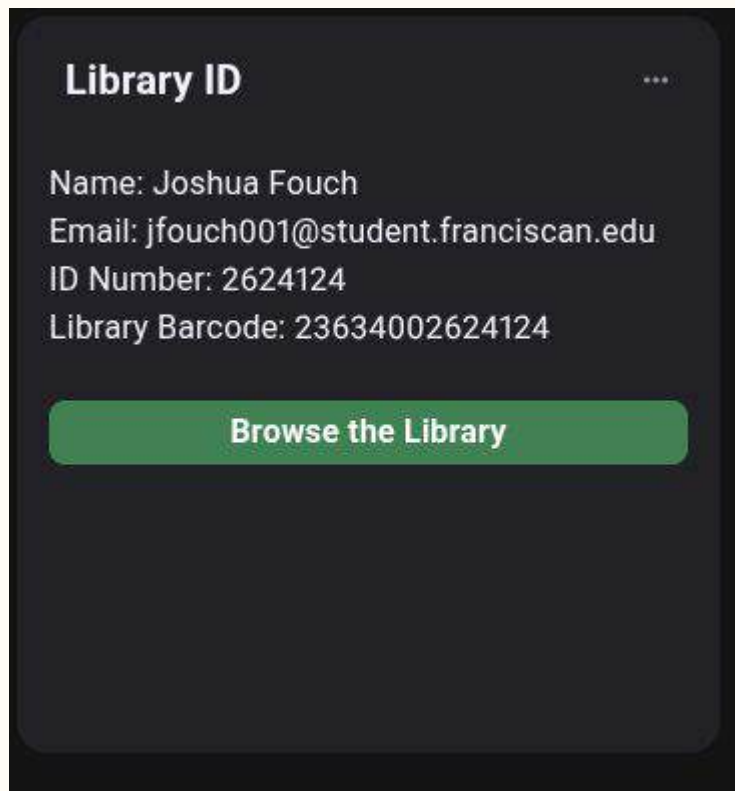

no more hero picture

easy to read active-page bar

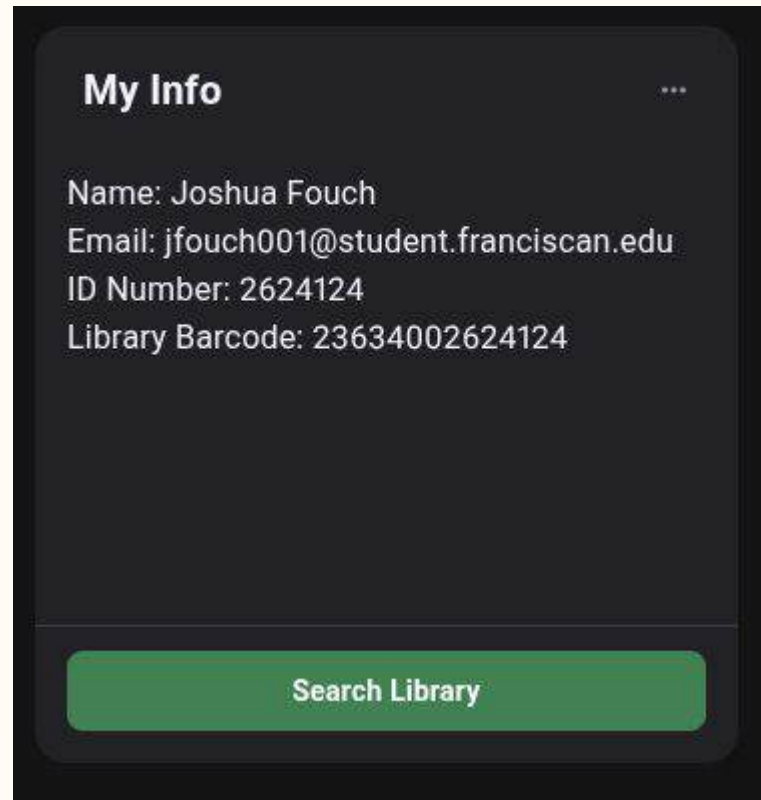

Green nav bars

Proportional
widgets

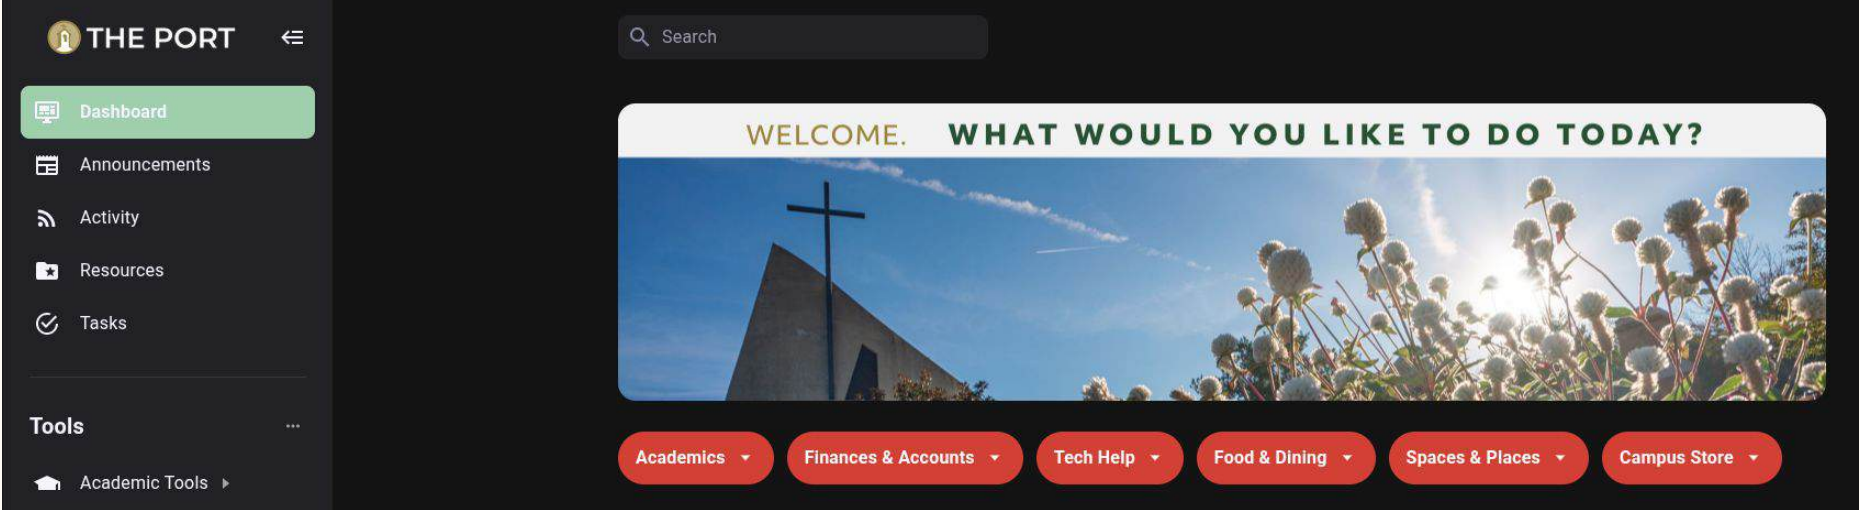

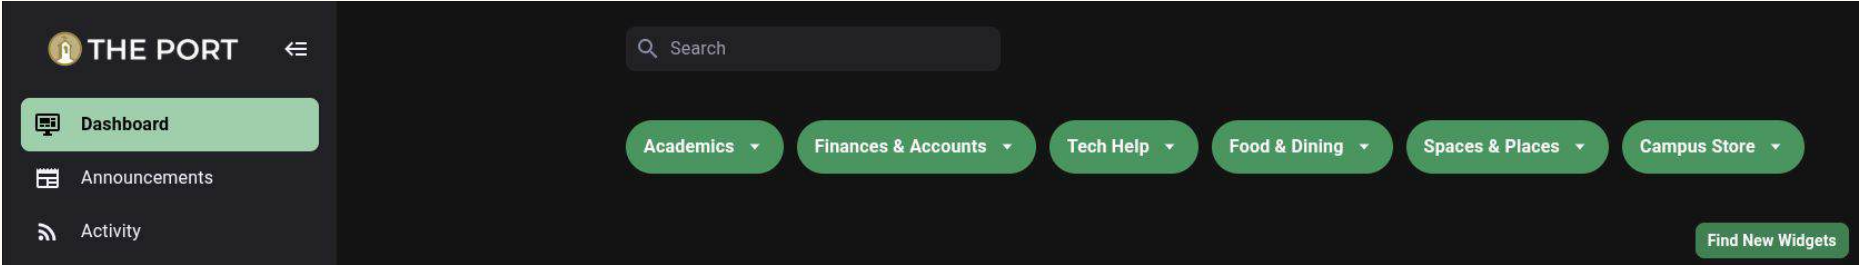

before

after

before

after

low: hidden;">

```
<div class="simplebar-content" style="padding: 0px;">
  ::before
  <div id="widgetContainer">
    <div class="UserInfo">
      <div class="UserName">Name: Joshua Fouch</div>
      <div class="Email">Email:
        jfouch001@student.franciscan.edu</div>
      <div class="AlternateID">ID Number: 2624124</div>
      <div class="Barcode">Library Barcode: 23634002624124
        </div>
      <br>
    </div>
    </div>
    <div class="cta-container widget-cta d-flex">
      <a class="cta-button btn primary md w-100" target="_blank" href="https://port.franciscan.edu/pages/academics-and-registration">Search Library</a>
    </div>
  </div>
  ::after
</div>
</div>
<div class="simplebar-placeholder" style="width: 299px; height: 176px;"></div>
<div class="simplebar-track simplebar-horizontal" style="visibility: hidden;"></div>
<div class="simplebar-track simplebar-vertical" style="visibility: hidden;"></div>
</div>
```

element.style {

```
.d-flex {
  display: flex !important;
}

.widget-cta {
  padding: 12px 16px 16px;
  background-color: var(--white);
  border-top: 1px solid;
  width: 100%;
  display: block;
  position: fixed;
  bottom: 0px;
}

::before, ::after {
  box-sizing: inherit;
}

div {
  display: block;
  unicode-bidi: isolate;
}

Inherited from div.simplebar-content-wrap...

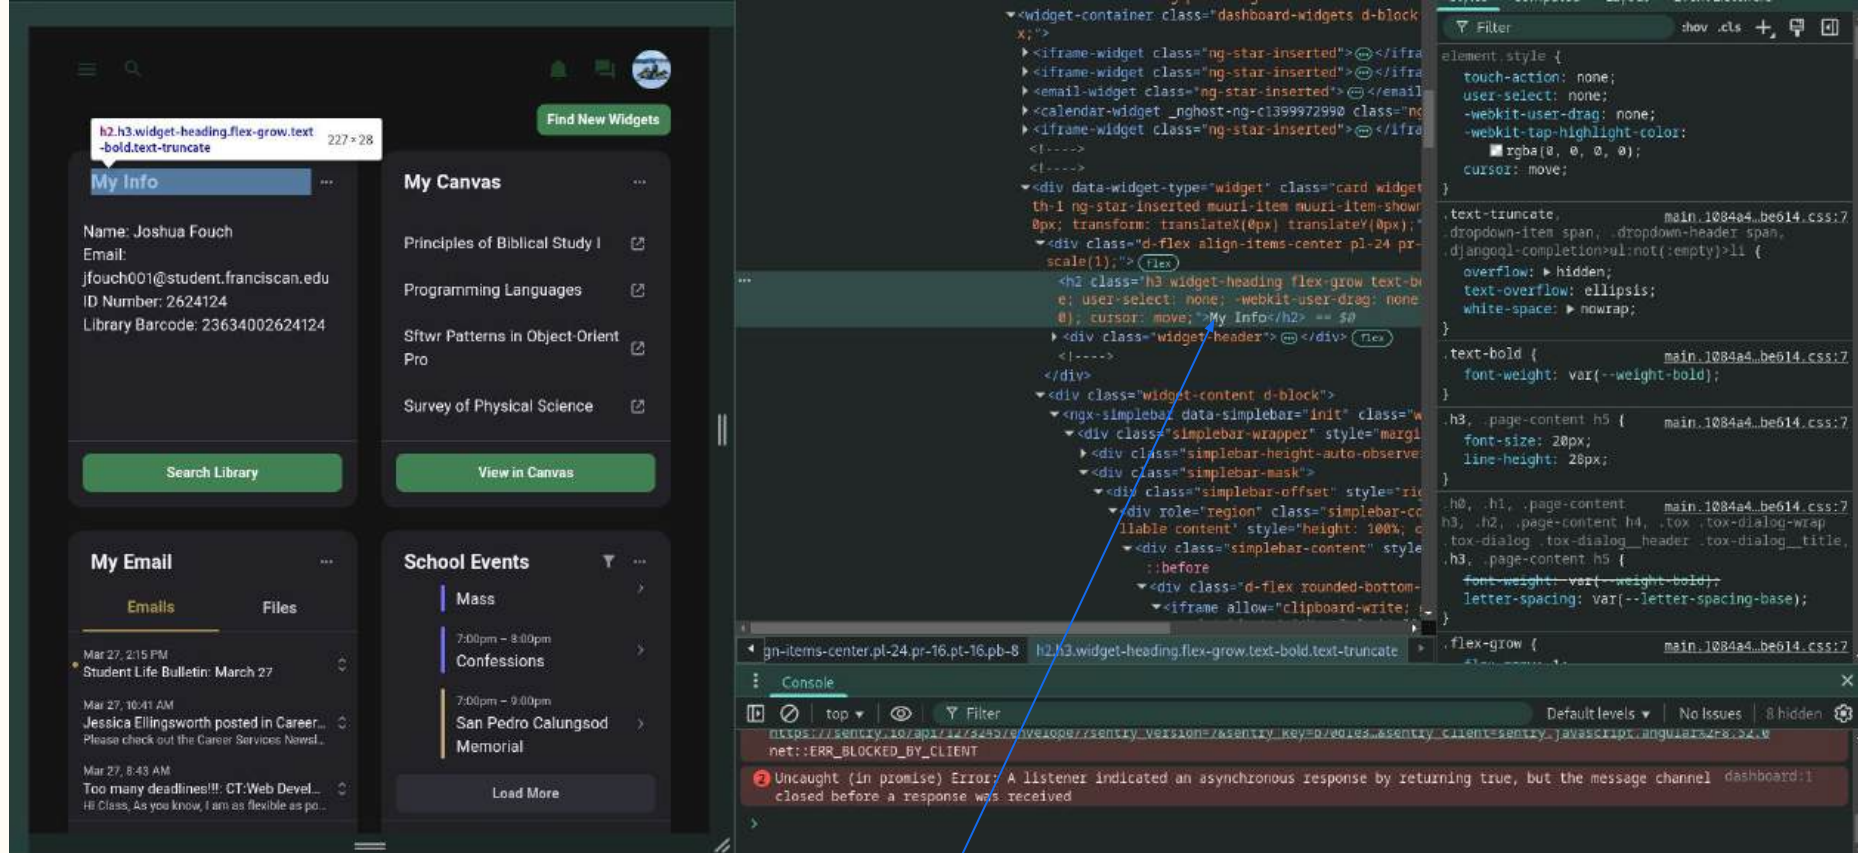

.simplebar-content-wrapper {
  direction: inherit;
  position: relative;
  display: block;
  height: 100%;
  width: auto;
  max-width: 100%;
}
```

Console

```
https://sentry.io/api/12/5453/envelope/?sentry_version=7&sentry_key=0/edies&sentry_client=sentry.javascript.angular&s2f8.32.w
net::ERR_BLOCKED_BY_CLIENT

Uncaught (in promise) Error: A listener indicated an asynchronous response by returning true, but the message channel dashboard:1
closed before a response was received
```

Copied this `<a>` tag from other widgets and added to the bottom of the Library info widget

Changed Widget header for each Widget

The image shows a web application interface with a dark theme. The interface is divided into several sections:

- Top Navigation:** A horizontal bar with links for "Academics", "Finances & Accounts", "Tech Help", and "Food". A search bar is also present.
- Left Sidebar:** Contains sections for "My Info", "My Canvas", "My Email", and "School Events".
- Main Content Area:** Displays a list of items under "My Canvas" and "My Email".
- Right Sidebar:** Includes a search bar and a "Find New Widgets" button.

The interface is built using Angular and Bootstrap. The CSS code editor on the right shows the following styles:

```
quick-link-capsule .capsule {
  border-radius: 24px;
  padding: 12px 16px;
  background-color: var(--quick-link-capsule-bg-color);
  display: inline-flex;
  align-items: center;
  color: var(--quick-link-capsule-text-color);
  font-weight: var(--weight-bold);
  max-width: 230px;
}

button, select {
  text-transform: none;
}
```

The console shows an error message: "Uncaught (in promise) Error: A listener indicated an asynchronous response by returning true, but the message channel dashboard:1 closed before a response was received".

Changed color variable hex code
